CONTENTS OF VOLUME 20

PART 1

	Communication	Page
Decay of Rubber Wood in a Replanting and its Effect on Root Disease. *A. Newsam, K.P. John and B. Sripathi Rao*	413	1
Statistical Analysis of Rainfall Records at the R.R.I.M. Experiment Station. *R. Narayanan*	414	8
Determination of Osmolarity of Small Latex Samples by Vapour Pressure Osmometer. *S.W. Pakianathan*	415	23
Latex Dipping I. Relationship Between Dwell Time, Latex Compound Viscosity and Deposit Thickness. *A.D.T. Gorton*	416	27
Local Changes in Bark Dimensions of *Hevea brasiliensis* Very Close to the Tapping Cut. *W.A. Southorn*	417	36
Effect of Density of Planting on the Growth, Yield and Economic Exploitation of *Hevea brasiliensis* Part II. The Effect on Profit. *Colin Barlow and Lim Sow Ching*	418	44

PART 2

Through-Circulation Drying of Particulate Natural Rubber I. Heveacrumb. *S. Sethu*	419	65
Optimum Number of Trees in Tapping Experiments on *Hevea brasiliensis* I. Half Spiral Alternate Daily Tapping with and without Stimulation. *R. Narayanan, P'ng Tat Chin and E.K. Ng*	420	80
Alignment of Anatomical Elements in the Stem of *Hevea brasiliensis*. *J.B. Gomez and Chen Khyun Thai*	421	91
Physiological Changes in *Hevea* Trees under Intensive Tapping. *S.E. Chua*	422	100
Contamination of Field Latex and Solid Rubber by Copper Fungicides. *R.L. Wastie and N.M. Pillai*	423	106
Effects of Specific Micro-Organisms on the Technological Properties of Rubber. *C.K. John and J. O'Connell*	424	112

PART 3

	Communication	Page
Studies of Root Systems of Some Cover Plants. *M.M. Chandapillai*	425	117
Girth as a Calibrating Variate for Improving Field Experiments on *Hevea brasiliensis*. *R. Narayanan*	426	130
Growth Studies in *Hevea brasiliensis* I. Growth Analysis up to Seven Years After Budgrafting. *J.K. Templeton*	427	136
Viscosity Measurements on Concentrated Natural Rubber Solutions after Mastication and Sunlight Degradation. *S. Nair and R. Narayanan*	428	147
Effect of Pumping on the Properties of High Ammonia Natural Rubber Latex Concentrates. *N.M. Pillai*	429	152

PART 4

Influence of Plot Sizes on Precision in Manuring Experiments on *Hevea brasiliensis*. *G.C. Iyer*	430	161
Use of Actidione to Control Mould Contaminants in *Hevea* Latex Systems Containing Yeasts and Bacteria. *C.K. John*	431	173
Latex Flow Studies I. Electron Microscopy of *Hevea brasiliensis* in the Region of the Tapping Cut. *W.A. Southorn*	432	176
Latex Flow Studies II. Influence of Lutoids on the Stability and Flow of *Hevea* Latex. *W.A. Southorn and E.E. Edwin*	433	187
Latex Flow Studies III. Electrostatic Considerations in the Colloidal Stability of Fresh *Hevea* Latex. *W.A. Southorn and Esah Yip*	434	201

PART 5

Effects of Trace Elements on *Hevea brasiliensis* Seedlings Grown in the Nursery. *J.A. Varley*	435	217
Latex Flow Studies IV. Thixotropy due to Lutoids in Fresh Latex Demonstrated by a Microviscometer of New Design. *W.A. Southorn*	436	226
Latex Flow Studies V. Rheology of Fresh *Hevea* Latex Flow in Capillaries. *W.A. Southorn and Esah Yip*	437	236

	Communication	Page
Latex Flow Studies VI. Effects of High Pressure Gradients on Flow of Fresh *Hevea* Latex in Narrow Bore Capillaries. *Esah Yip and W.A. Southorn*	438	248
Effect of Production Procedures on Properties of PA 80 Rubber. *A.D.T. Gorton*	439	257
Leaching of Fertilisers Applied to a Latosol in Lysimeters. *J. Bolton*	440	274
A Medium for Isolation and Cultivation of *Hevea* Latex Bacteria. *C.K. John*	441	285
Stimulation of Latex Flow in *Hevea brasiliensis* by 4-Amino-3,5,6-Trichloropicolinic Acid and 2-Chloroethanephosphonic Acid. *P.D. Abraham, P.R. Wycherley and S.W. Pakianathan*	442	291
